Resources and Information for Parents, Carers, Schools and Supporting Professionals During the Coronavirus

Do not change your behaviour to avoid being infected. Assume you are infected and change your behaviour to avoid transmitting (Alexandra College, 2020).

A series of thin, overlapping, wavy lines in shades of blue and grey originate from the bottom left and curve upwards and to the right, creating a sense of movement and depth.

This document has been compiled in recent days from the many posts submitted by Educational and Child Psychologist's throughout the UK. This professional body of applied psychologists have offered and continue to offer and provide their support to children, young people, families, schools, other agencies and each other in these unprecedented times. It is not possible to individually list the many contributors, but a sincere thank you to the Educational and Child Psychologists in the UK for your valued contributions. In the spirit of supporting each other, please feel free to share.
